

## List of UMTS networks

From Wikipedia, the free encyclopedia

(Redirected from [List of Deployed UMTS networks](#))

Jump to: [navigation](#), [search](#)

Beginning in 2003 under the name [3](#), [Hutchison Whampoa](#), a large port operator, has gradually launched their startup [UMTS](#) networks worldwide including Australia, Austria, Denmark, Hong Kong, Italy, United Kingdom, Ireland and Sweden.

Operators are starting to sell mobile internet products that combine 3G and [Wi-Fi](#) in one service. Laptop owners are sold a UMTS modem and given a client program that detects the presence of a Wi-Fi network and switches between 3G and Wi-Fi when available. Initially Wi-Fi was seen as a competitor to 3G, but it is now recognised that as long as the operator owns or leases the Wi-Fi network, they will be able to offer a more competitive product than with UMTS only. Nokia predicted that by the end of 2006 one sixth of all cellular phones would be UMTS devices.
